PROJECTS

BOOMBOX (Flask, ReactJS, Redux)

[live](#) | [github](#)

A fullstack single-page Spotify clone where users can stream music, create playlists, and follow other users and playlists.

- Integrated HTML5 audio player to create customized audio playback for the user.
- Implemented a queue slice-of-state with Redux, enabling sharing of information across React components and allowing seamless continuous audio play as the user browses site.

INSTAGRAMME (Flask, ReactJS, Redux)

[live](#) | [github](#)

A fullstack Instagram clone where users can share posts with followers, follow other users, and comment on posts.

- Utilized Flask-SQLAlchemy to create self-referential many-to-many relationship in database, enabling access to collection of users that a given user follows and that user's followers without need for multiple separate database models, significantly reducing server load and simplifying relevant backend queries.

LAIRBNB (Express, ReactJS, Redux)

[live](#) | [github](#)

A fullstack parody Airbnb clone where users can create and review accommodations of infamous villains' lairs.

- Created custom SQL queries and reduced server load through model associations to extract data from multiple tables in single query.
